

As a owner operator truck driver and someone who is on the road a lot, I ask you to PLEASE reject the NAB'S petition 04-160. You can surely understand how helpful it is to be able to check on the weather or any traffic problems that may be going on in the area where we are delivering a load. It is also a safety measure to be able to avoid major problems on our highways. Who knows we just might be delivering the very thing that might save you or a loved one's life. Respectfully, Carol Kendrick
